2 Stress less

Ask your doctor if a 3-month supply is an option vs. a 1-month supply of your medication. Then request that your doctor send your 3-month prescription to Express Scripts® Pharmacy for home delivery to save you even more.

You can also:

Transfer an existing prescription to home delivery by clicking Add to Cart

For new prescriptions, you have three options:

- + Ask your doctor to send it to Express Scripts Pharmacy
- + Click the Request an Rx link on the online dashboard and we'll contact your doctor for you
- + Or print a home delivery form by selecting Forms under Benefits, then follow the mailing instructions

3 Save more

Seeing your doctor? Ask if they use **Real-Time Prescription Benefit** to check for the most affordable pricing for you and to help avoid a coverage review like prior authorization.

If not, **use your online account during your visit to check pricing on any prescription**—a less costly option may be available that's just as effective. Request that medication instead.

These alternate options:

- + Help reduce costs and ensure you receive a safe and proven-effective medication
- + Usually are generic forms of brand-name drugs
- + Don't rely on coupons, which could cost you more over time

Ask about switching to generic medications to save money on your prescriptions.

The easiest—and safest—way to save money on prescriptions is to ask for a generic, which typically costs less because the manufacturer did not have to conduct the initial research or studies that the branded drug did.

Generics fall into two categories:

- + Direct chemical equivalent—a drug that has the same active ingredient as its brand-name counterpart
- + Therapeutic alternative—a drug that may not be chemically equivalent to the brand, but has the same therapeutic or treatment effect

Direct chemical equivalents are practically identical to the branded drug, while therapeutic alternatives are part of the same family.

FDA-approved generics must adhere to strict guidelines and are the same as a brand-name medication in dosage, safety, effectiveness, strength, stability and quality.
